

**CHEMICAL WEAPONS CONVENTION
GUIDANCE NOTES:
AGGREGATE NATIONAL DATA ELECTRONIC
DECLARATIONS
FOR SCHEDULE 2 AND 3 CHEMICALS**

These Guidance Notes accompany a notice served under section 22(1) of the Chemical Weapons Act 1996 (“the 1996 Act”). The statutory notice requires the full and accurate completion of an electronic declaration form(s). The electronic declaration form(s) must be completed in accordance with these Guidance Notes. The duly completed form(s) must then be electronically submitted via the Chemical Weapons Convention Declaration Database to the UK Chemical Weapons Convention National Authority. The notice specifies a date by which you must ensure that the National Authority receives the completed electronic form(s).

The notice under section 22(1) creates a legal obligation which must be complied with. Failure to return the completed electronic declaration form(s) by the due date without reasonable excuse is an offence contrary to section 22(3) of the 1996 Act. It is also an offence, contrary to section 22(4) of the 1996 Act, knowingly to provide false or misleading information in completing the electronic declaration form(s).

These guidance notes explain how to complete an Aggregate National Data Electronic Declaration covering past activity in the calendar year 2010 for Schedule 2 and Schedule 3 chemicals. You must read them carefully before completing the electronic declaration forms.

Completed electronic declaration forms should be submitted via the Chemical Weapons Convention Declaration Database no later than **the Deadline Date as specified on the Legal Notice for this declaration.**

1. Background to Aggregate National Data Electronic Declarations

As a result of a decision by the Organisation for the Prohibition of Chemical Weapons (OPCW) Conference of States Parties, in October 2002, to bring about greater consistency between the information submitted by different Chemical Weapons Convention (CWC) State Parties, all producers, processors, consumers, importers and exporters of Schedule 2 chemicals and all producers, importers and exporters of Schedule 3 chemicals, regardless of the volumes involved, need to provide the UK National Authority with certain basic quantitative data for inclusion in the UK's Aggregate National Data (AND) Declaration. The National Authority has a legal obligation to submit the information to the Organisation for the Prohibition of Chemical Weapons (OPCW) by the end of March 2011, covering activities in 2010. It is important to note, however, that provision of this information does not automatically make any AND declarer subject to the OPCW's inspection regime.

To clarify, declarable activities for inclusion in an Aggregate National Data Electronic Declaration are those where an organisation, in the past calendar year,:

a) produced, processed, consumed, imported or exported one or more of the chemicals listed in Schedule 2 to the Chemical Weapons Convention;

and/or

b) produced, imported or exported one or more of the chemicals listed in Schedule 3 to the Chemical Weapons Convention.

A copy of the chemicals covered under Schedule 2 and Schedule 3 of the CWC is at [Annex A](#) to these guidance notes. Additionally provided for reference, at [Annex B](#), is a list of every Schedule 2 and Schedule 3 chemical that has been declared to the OPCW above its relevant site declaration threshold.

The production, processing, consumption, import or export of chemical mixtures that contain a Schedule 2 chemical may also need to be declared, as may the production, import or export of chemical mixtures that contain a Schedule 3 chemical. Guidance on how to deal with chemical mixtures is contained in the definitions section at [Annex C](#) to these guidance notes.

The flow chart at [Annex D](#) is for use in clarifying whether an organisation needs to make an electronic declaration, particularly in relation to mixtures, which contain Schedule 2 or Schedule 3 chemicals. The chart must be followed from Start 1 and then Start 2 in turn to ensure both Schedule 2 and Schedule 3 chemical scenarios have been addressed.

Imports from and exports to Crown Dependencies and British Overseas Territories do not need to be declared. Annex E lists these countries.

- *Annex A contains the CWC list of Schedule 2 and Schedule 3 chemicals.*
- *Annex B contains a list of every Schedule 2 and Schedule 3 chemical declared above its relevant site declaration threshold.*
- *Annex C contains definitions of terms used in the declaration form.*
- *Annex D contains a flow chart on whether or not a declaration is required.*
- *Annex E contains a list of Crown and Dependent Territories.*

2. Detailed Guidance for PART A: ORGANISATION DETAILS

Part A of the form asks for information about the organisation where the declarable Schedule 2 and/or Schedule 3 activities have occurred.

The declaration should only contain information relating to a single organisational site i.e. not multiple sites across the country.

Section A1 and A2 – Organisation Name and Address (Already pre-filled)

This contains the common name and address of the organisation where the Schedule 2 and/or Schedule 3 declarable activities have occurred i.e. name and address of the company; university; or Government laboratory.

Section A3 – Schedule 2 and Schedule 3 Declarable Activities

Tick whether the organisation has carried out declarable Schedule 2 and/or Schedule 3 chemical activities. If you indicate that no activities have taken place, you need proceed no further other than to complete Part F and submit the electronic form.

If you have indicated that no activities have taken place but would like to complete Part D and Part E prior to submitting the electronic form please do so.

NB: Please refer to the definitions, including those on chemical mixtures, at Annex C to these guidance notes.

Section A4 and A5 – Number of Declarable Schedule 2 and Schedule 3 Chemicals

The number of declarable Schedule 2 and Schedule 3 chemicals in *given year* needs to be identified in order to ascertain whether the correct numbers of Part B and Part C of the form have been completed.

Department of Energy & Climate Change

A copy of the chemicals covered under Schedule 2 and Schedule 3 of the CWC is at [Annex A](#). A list of every Schedule 2 and Schedule 3 chemical that has been declared to the OPCW above its relevant site declaration threshold is at [Annex B](#).

3. AND Flow Chart

AND Flow Chart (Already pre-filled but can be amended)

Please answer the questions to determine whether it is necessary to submit an electronic Aggregate National Data declaration for the site. These questions are an electronic implementation of the flowchart in Annex D.

4. Detailed Guidance for PART B: SCHEDULE 2 CHEMICAL DETAILS

Part B of the electronic declaration form asks for information on the production, processing, consumption, import or export of Schedule 2 chemicals. At Part B separate record must be completed covering the activity totals for each different Schedule 2 chemical. Any import and/or export quantities declared in section B4 must be broken down by country and quantity in B5 and/or B6. An example may be helpful.

- 1. Three separate areas produce 50, 30 and 45 units respectively of a particular Schedule 2 chemical. This example requires the three separate production quantities to be added together and declared as 125 units.
- 2. Three separate areas imported 20, 25 and 15 units respectively of a Schedule 2 chemical from three separate countries. This example requires the three separate import quantities to be added together and declared as 60 units in B4, and then broken down by country of origin and relevant quantities in B5.

This section relates to the whole of the organisation's site. If the same Schedule 2 chemical is produced, processed, consumed, imported or exported in/from more than one place (or at more than one concentration) on the organisation's site the amounts should be combined into a single Part B for that chemical.

At Part B you should complete a separate record for each Schedule 2 chemical produced, processed, consumed, imported or exported.

Section B1, B2 and B3 – Full Description of the Schedule 2 Chemical (Already pre-filled but can be amended)

The chemical name, common or trade name and the Chemical Abstracts Service registry number (if assigned) should be provided.

Section B4 – Amounts of the Schedule 2 Chemical at the Organisation in *given year*

Record here the total amounts of the Schedule 2 chemical produced, processed, consumed, imported or exported in *given year*. If the Schedule 2 chemical was

contained in a mixture the total quantity of the mixture and the percentage concentration should also be provided. The unit of measure must also be provided in each case and it would help, but not essential, if these were consistent. Where available, please give quantities provided in tonnes, kilogrammes or grammes to two significant figures, and quantities provided in lower units of measure to the nearest whole unit.

Section B5 - Direct Imports of the Schedule 2 Chemical from Countries outside the UK in *given year*

Record here by country the total quantities of each Schedule 2 chemical imported directly by the organisation from outside the UK in the year *given year*. **Direct imports do not include chemicals bought from a trader in the UK who imports them. Traders must, however, provide this import information in their declarations.** If the Schedule 2 chemical was present as a mixture the total quantity of the mixture and the percentage concentration should also be provided. The unit of measure must also be provided in each case and it would be helpful, but not essential, if these were consistent. Where available, please give quantities provided in tonnes, kilogrammes or grammes to two significant figures, and quantities provided in lower units of measure to the nearest whole unit.

Please see Annex E for countries that are Crown Dependencies and British Overseas Territories. Imports from these countries do not need to be declared.

Section B6 – Direct Exports of the Schedule 2 Chemical to Countries outside the UK in *given year*

Record here by country the total quantities of each Schedule 2 chemical directly exported by the organisation outside the UK in the year *given year*. **Direct exports do not include chemicals sold to a trader in the UK who exports them. Traders must, however, provide this export information in their declarations.** If the Schedule 2 chemical was present as a mixture the total quantity of the mixture and the percentage concentration should also be provided. The unit of measure must also be provided in each case and it would be helpful, but not essential, if these were consistent. Where available, please give quantities provided in tonnes, kilogrammes or grammes to two significant figures, and quantities provided in lower units of measure to the nearest whole unit.

Please see Annex E for countries that are Crown Dependencies and British Overseas Territories. Exports to these countries do not need to be declared

5. Detailed Guidance for PART C: SCHEDULE 3 CHEMICAL DETAILS

Part C of the electronic declaration form asks for information on the production, import or export of Schedule 3 chemicals. As for Schedule 2, at Part C a separate record must be completed covering the activity totals for each different Schedule 3 chemical. Any import and/or export quantities declared in section C4 must be broken down by country and quantity in C5 and/or C6.

This section relates to the whole of the organisation's site. If the same Schedule 3 chemical is produced, imported or exported in/from more than one place (or at more than one concentration) on the organisation's site the amounts should be combined into a single Part C for that chemical.

A separate record at Part C should be completed for each Schedule 3 chemical produced, imported or exported.

Section C1, C2 and C3 – Full Description of the Schedule 3 Chemical (Already pre-filled but can be amended)

The chemical name, common or trade name and the Chemical Abstracts Service registry number (if assigned) should be provided.

Section C4 – Amounts of the Schedule 3 Chemical at the Organisation in *given year*

Record here the total amounts of the Schedule 3 chemical produced, imported or exported in *given year*. If the Schedule 3 chemical was contained in a mixture the total quantity of the mixture and the percentage concentration should also be provided. The unit of measure must also be provided in each case and it would help, but not essential, if these were consistent. Where available, please give quantities provided in tonnes, kilogrammes or grammes to two significant figures, and quantities provided in lower units of measure to the nearest whole unit.

Section C5 - Direct Imports of the Schedule 3 Chemical from Countries outside the UK in *given year*

Record here by country the total quantities of each Schedule 3 chemical imported directly by the organisation from outside the UK in the year *given year*. **Direct imports do not include chemicals bought from a trader in the UK who imports them. Traders must, however, provide this import information in their declarations.** If the Schedule 3 chemical was present as a mixture the total quantity of the mixture and the percentage concentration should also be provided. The unit of measure must also be provided in each case and it would help, but is not essential, if these were consistent. Where available, please give quantities provided in tonnes, kilogrammes or grammes to two significant figures, and quantities provided in lower units of measure to the nearest whole unit.

Department of Energy & Climate Change

Please see Annex E for countries that are Crown Dependencies and British Overseas Territories. Imports from these countries do not need to be declared.

Section C6 – Direct Exports of the Schedule 3 Chemical to Countries outside the UK in *given year*

Record here by country the total quantities of each Schedule 3 chemical directly exported by the organisation outside the UK in the year *given year*. **Direct exports do not include chemicals sold to a trader in the UK who exports them. Traders must, however, provide this export information in their declarations.** If the Schedule 3 chemical was present as a mixture the total quantity of the mixture and the percentage concentration should also be provided. The unit of measure must also be provided in each case and it would help, but is not essential, if these were consistent. Where available, please give quantities provided in tonnes, kilograms or grams to two significant figures, and quantities provided in lower units of measure to the nearest whole unit.

Please see Annex E for countries that are Crown Dependencies and British Overseas Territories. Exports to these countries do not need to be declared.

6. Detailed Guidance for PART D: CHEMICAL SOURCES

Part D of the form asks for the details of all the UK companies from whom you obtained the Schedule 2 and/or Schedule 3 chemicals in your possession in *given year*.

In order to ensure that the UK National Authority is aware of all relevant companies/entities involved in declarable CWC Schedule 2 and/or Schedule 3 chemical activities, the details of all the UK companies from whom you obtained the Schedule 2 and/or Schedule 3 chemicals in your possession in *given year* is required. If you do not source Schedule 2 and/or Schedule 3 chemicals from the UK (i.e. you import or you produce your own) Part D is not applicable.

At Part D a separate record must be completed for any additional sources as necessary

Section D1 and D2 – Company Name and Address (Already pre-filled but can be amended)

Insert the name and address of the company(ies) from which you have sourced the Schedule 2 and/or Schedule 3 chemicals in your possession in *given year*.

Section D3 – Scheduled Chemicals Provided by the Company (Already pre-filled but can be amended)

Department of Energy & Climate Change

Insert the chemical name, common or trade name and the Chemical Abstracts Service registry number (if assigned) of each Schedule 2 and/or Schedule 3 chemical supplied by the company detailed in Sections D1 and D2.

7. Detailed Guidance for PART E: CUSTOMER DETAILS

Part E of the form asks for the details of all the UK companies to whom you sent the Schedule 2 and/or Schedule 3 chemicals in your possession in *given year*.

In order to ensure that the UK National Authority is aware of all the relevant companies/entities involved in declarable CWC Schedule 2 and/or Schedule 3 chemical activities, the details of all the UK companies you sent the Schedule 2 and/or Schedule 3 chemicals to in *given year* is required. If you do not sell Schedule 2 and/or Schedule 3 chemicals to other UK organisations (i.e. you export or you only consume and/or process without selling the mixture on (if the mixture is sold to a UK company/entity then the relevant concentration level needs applying to determine whether the customer details need to be provided)) Part E is not applicable.

At Part E a separate record must be completed for any additional customers as necessary

Section E1 and E2 – Company Name and Address (Already pre-filled but can be amended)

Insert the name and address of the UK company(ies) to whom you sent the Schedule 2 and/or Schedule 3 chemicals in your possession in *given year*.

Section E3 – Schedule 2 Chemicals Supplied to the Company (Already pre-filled but can be amended)

Insert the chemical name, common or trade name and the Chemical Abstracts Service registry number (if assigned) of each Schedule 2 and/or Schedule 3 chemical supplied to the company detailed in Sections E1 and E2.

8. PART F: Declaration

Part F The form must be electronically signed/authorised by a person of the appropriate level of responsibility who is in a position to verify the accuracy of the information and who has legal authority to sign/authorise on behalf of the company/other organisation.

Contact details can be updated using the ‘Update My Details’ link from the workbasket menu.

Position (Already pre-filled but can be amended)

Please choose the description which most closely matches your position within the organisation on whose behalf you are submitting the declaration.

9. Viewing Previous Years Declarations

To view your sites previous years electronic declarations you should access the "CWC Declarations" option on the left hand menu which goes to a search screen. You can then access and view all past declarations.

ANNEXES TO THE AGGREGATE NATIONAL DATA DECLARATION GUIDANCE NOTES FOR SCHEDULE 2 AND SCHEDULE 3 CHEMICALS

Annex A CWC Schedule 2 & Schedule 3 Chemicals

Schedule 2 Chemical	Chemical Abstract Service Number (CAS)
A Toxic Chemicals:	
1 Amiton: O,O-Diethyl S-[2-(diethylamino)ethyl] phosphorothiolate and corresponding alkylated or protonated salts	(78-53-5)
2 PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene	(382-21-8)
3 BZ: 3-Quinuclidinyl benzilate (*)	(6581-06-2)
B Precursors:	
4 Chemicals, except for those listed in Schedule I, containing a phosphorus atom to which is bonded one methyl, ethyl or propyl (normal or iso) group but not further carbon atoms, e.g. Methylphosphonyl dichloride Dimethyl methylphosphonate Exemption: Fonofos: O-Ethyl S-phenyl ethylphosphonothiolothionate	(676-97-1) (756-79-6) (944-22-9)
5 N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides	
6 Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr or i-Pr)- phosphoramidates	
7 Arsenic trichloride	(7784-34-1)
8 2,2-Diphenyl-2-hydroxyacetic acid	(76-93-7)
9 Quinuclidin-3-ol	(1691-34-7)
10 N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts	
11 N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts Exemptions: N,N-Dimethylaminoethanol and corresponding protonated salts N,N-Diethylamirioethanol and corresponding protonated salts	(108-01-0) (100-37-8)
12 N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-thiols and corresponding protonated salts	
13 Thiodiglycol: Bis(2-hydroxyethyl) sulfide	(111-48-8)
14 Pinacolyl alcohol: 3,3-Dimethylbutane-2-ol	(464-07-3)

Department
of Energy &
Climate Change

Schedule 3 Chemical	Chemical Abstract Service Number (CAS)
A Toxic Chemicals:	
1 Phosgene: Carbonyl dichloride	(75-44-5)
2 Cyanogen chloride	(506-77-4)
3 Hydrogen cyanide	(74-90-8)
4 Chloropicrin: Trichloronitromethane	(76-06-2)
B Precursors:	
5 Phosphorus oxychloride	(10025-87-3)
6 Phosphorus trichloride	(7719-12-2)
7 Phosphorus pentachloride	(10026-13-8)
8 Trimethyl phosphite	(121-45-9)
9 Triethyl phosphite.	(122-52-1)
10 Dimethyl phosphite	(868-85-9)
11 Diethyl phosphite	(762-04-9)
12 Sulfur monochloride	(10025-67-9)
13 Sulfur dichloride	(10545-99-0)
14 Thionyl chloride	(7719-09-7)
15 Ethyldiethanolamine	(139-87-7)
16 Methyldiethanolamine	(105-59-9)
17 Triethanolamine	(102-71-6)

of Energy &
Climate Change

Annex B **Schedule 2 & Schedule 3 Chemicals Declared by States Party**

<u>Schedule</u>	<u>CAS Number</u>	<u>Chemical Name</u>
Schedule 2		
2A01	78-53-5	O,O-Diethyl S-2-diethylaminoethyl phosphorothiolate
2A02	382-21-8	1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene
2A03	6581-06-2	3-Quinuclidinyl benzilate
2B041		Sodium O-(cyclohexylmethyl) isopropylphosphonothiolate
2B041		Sodium O-(cyclohexylmethyl) propylphosphonothiolate
2B041		Sodium O-heptyl isopropylphosphonothiolate
2B041		Sodium O-(1-ethylpropyl) propylphosphonothiolate
2B041		Sodium O-ethyl isopropylphosphonothiolate
2B041		Isopropyl ethylphosphonochloridate
2B041		Sodium O-isopropyl isopropylphosphonothiolate
2B041		Sodium O-propyl propylphosphonothiolate
2B041		Sodium O-butyl isopropylphosphonothiolate
2B041		Sodium O-butyl propylphosphonothiolate
2B041		Isobutyl isopropylphosphonochloridate
2B041		Isobutyl propylphosphonochloridate
2B041		Sec-butyl isopropylphosphonochloridate
2B041		Sodium O-(sec-butyl) isopropylphosphonothiolate
2B041		Sec-butyl propylphosphonochloridate
2B041		Sodium O-(1-methylbutyl) propylphosphonothiolate
2B041	1066-50-8	Ethylphosphonic dichloride
2B041		Methyl hydrogen methylphosphonate
2B041		S-Methyl methylphosphonochloridothiolate
2B041	133826-40-1	Phenyl methylphosphonofluoridate
2B041		2-Ethylhexyl hydrogen methylphosphonate
2B041	138780-00-4	(E)-2-Butenyl methylphosphonofluoridate
2B041	1445-75-6	Diisopropyl methylphosphonate
2B041	1498-46-0	Isopropylphosphonic dichloride
2B041	1538-69-8	Diethyl isopropylphosphonate
2B041		Isobutyl methylphosphonochloridate
2B041	18755-43-6	Dimethyl propylphosphonate
2B041	18812-51-6	Diethyl propylphosphonate
2B041		Sodium O-ethyl methylphosphonothiolate
2B041		O-Ethyl hydrogen methylphosphonothiolate
2B041	2404-73-1	Dibutyl methylphosphonate
2B041		1-Methyl-2-propynyl methylphosphonofluoridate
2B041	4672-38-2	Propylphosphonic acid
2B041	4708-04-7	Propylphosphonic dichloride

Department
of Energy &
Climate Change

2B041		Sodium O-propyl methylphosphonothiolate
2B041	5284-09-3	Ethyl methylphosphonochloridate
2B041		Methylphosphonothioic O,O-acid
2B041	676-97-1	Methylphosphonic dichloride
2B041		Ethylphosphonic acid
2B041	683-08-9	Diethyl methylphosphonate
2B041		2,4,6-Tripropyl-1,3,5,2,4,6-trioxatriphosphinane 2,4,6-trioxide
2B041	7040-58-6	Dipinacolyl methylphosphonate
2B041		Dipropyldiphosphonic acid
2B041		S-Methyl hydrogen methylphosphonothiolate
2B041	756-79-6	Dimethyl methylphosphonate
2B041	78-38-6	Diethyl ethylphosphonate
2B041		Sodium O-isopropyl methylphosphonothiolate
2B041		Methylphosphonic acid
2B042		Butyl methylphosphinate
2B043	15715-41-0	Diethyl methylphosphonite
2B043	25235-15-8	Isopropylphosphonous dichloride
2B043		Diethyl ethylphosphonite
2B043		Diethyl isopropylphosphonite
2B043	676-83-5	Methylphosphonous dichloride
2B043		Ethyl hydrogen methylphosphonite
2B045		Sodium O-decyl methylphosphonothionate
2B045		Sodium O-(1-ethylpropyl) ethylphosphonothionate
2B045		Sodium O-(1,2-dimethylpropyl) ethylphosphonothionate
2B045		N-Ethylbenzenaminium O-(1,2-dimethylpropyl) methylphosphonothionate (+)
2B045		N-Ethylbenzenaminium O-(1,2-dimethylpropyl) methylphosphonothionate (-)
2B045		Sodium O-(1-methylbutyl) methylphosphonothiolate
2B045		Sodium O-(1,2,2-trimethylpropyl) ethylphosphonothionate
2B045		Sodium O-(1-methylpentyl) ethylphosphonothionate
2B045		Sodium O-ethyl propylphosphonothionate
2B045		N-Dicyclohexylammonium O-(2,2-dimethylpropyl) methylphosphonothionate
2B045		N-Ethylbenzenaminium O-neopentyl methylphosphonothionate
2B045		Sodium O-neopentyl methylphosphonothionate
2B045		Sodium O-(1-ethylbutyl) ethylphosphonothionate
2B045		Ethylphosphonothioic acid
2B045		Ethyl ethylphosphonochloridothionate

2B12	5842-06-8	2-N,N-Dipropylaminoethanethiol
2B12	5842-07-9	2-N,N-Diisopropylaminoethanethiol
2B13	111-48-8	Bis(2-hydroxyethyl)sulfide

Department
of Energy &
Climate Change

2B14	464-07-3	3,3-Dimethyl-2-butanol
Schedule 3		
3A01	75-44-5	Carbonyl dichloride
3A02	506-77-4	Cyanogen chloride
3A03	74-90-8	Hydrogen cyanide
3A04	76-06-2	Trichloronitromethane
3B05	10025-87-3	Phosphorous oxychloride
3B06	7719-12-2	Phosphorous trichloride
3B07	10026-13-8	Phosphorous pentachloride
3B08	121-45-9	Trimethyl phosphite
3B09	122-52-1	Triethyl phosphite
3B10	868-85-9	Dimethyl phosphite
3B11	762-04-9	Diethyl phosphite
3B12	10025-67-9	Sulfur monochloride
3B13	10545-99-0	Sulfur dichloride
3B14	7719-09-7	Thionyl chloride
3B15	139-87-7	Ethyldiethanolamine
3B16	105-59-9	Methyldiethanolamine
3B17	102-71-6	Triethanolamine

Annex C **Definitions**

The definitions below follow the definitions in the Chemical Weapons Convention and might be slightly different from their normal meaning within the chemical industry.

Production

Production is defined under the CWC as “formation through a chemical reaction or synthesis” - that is, arising from a chemical change involving the formation and/or breaking of chemical bonds.

It is understood, for declaration purposes, to include all steps in the production of a chemical in any units within the same plant through chemical reaction, including any associated processes (e.g. purification, separation, extraction, distillation, or refining) in which the chemical is not converted into another chemical. The exact nature of any associated process (e.g. purification, etc.) is not required to be declared.

It is also understood, for declaration purposes, to include intermediates, by-products, or waste products that are produced and consumed within a defined chemical manufacturing sequence, where such intermediates, by-products, or waste products are chemically stable and therefore exist for a sufficient time to make isolation from the manufacturing stream possible, but where, under normal or design operating conditions, isolation does not occur.

Processing

Processing is physical manipulation of a chemical without a chemical reaction taking place, that is without the formation or breaking of chemical bonds. Examples of processing include formulation, extraction, purification, crystallisation, distillation, condensation, consumption, dilution, concentration, compression and dispersion. Any waste disposal processes occurring on the organisation's site involving a Schedule 2 chemical, which do not result in the consumption of that chemical (e.g. disposal of waste containing a Schedule 2 chemical in a landfill on the organisation's site or blending of such waste with other materials), should also be considered as processing. However, activities such as repackaging and distribution are not considered to be processing.

Consumption

Consumption of a chemical means its conversion into another chemical through a chemical reaction involving the making or breaking of chemical bonds. Therefore, some forms of waste disposal in which a Schedule 2 chemical is converted into another chemical, such as incineration, biodegradation or hydrolysis, e.g. in a scrubber system, should be considered as consumption.

Imports

An import is the physical movement of scheduled chemicals into the territory or any other place under the jurisdiction or control of the UK from the territory or any other place under the jurisdiction or control of another country, excluding transit operations.

Department of Energy & Climate Change

You must specify the country from which the scheduled chemicals were dispatched, excluding the countries through which the scheduled chemicals transited and regardless of the country in which the scheduled chemicals were produced.

Declare chemicals that are directly imported by your organisation from outside the UK. Direct imports do not include imported goods bought from or through a trader in the UK. Imports from the Crown Dependencies and British Overseas Territories do not need to be declared.

Exports

An export is the physical movement of scheduled chemicals out of the territory or any other place under the jurisdiction or control of the UK into the territory or any other place under the jurisdiction or control of another country, excluding transit operations. You must specify the intended country of destination, excluding the countries through which the scheduled chemicals transited.

Declare chemicals directly exported by your organisation to outside the UK. Direct exports do not include goods sold to a trader in the UK for onward export. Exports to the Crown Dependencies and British Overseas Territories do not need to be declared.

Transit Operations

Transit operations are the physical movements in which scheduled chemicals pass through the territory of a country on the way to their intended country of destination. Transit operations include changes in the means of transport, including temporary storage only for that purpose.

Chemical Mixtures

Schedule 2

A declaration is required for mixtures containing Schedule 2 chemicals where, at any point in the operation, the concentration of the Schedule 2 chemical(s) is greater than the following:

- Production/processing/consumption of Schedules 2A and 2A* chemicals - 1%.
- Production/ processing/consumption of Schedule 2B chemicals - 30%.

These concentration levels also apply to the import and export of chemical mixtures containing Schedule 2A and 2A* chemicals and Schedule 2B chemicals (i.e. 1% and 30% respectively).

Schedule 3

A declaration is required for mixtures containing Schedule 3 chemicals where, at any point in the operation, the concentration of the Schedule 3 chemical is greater than 30%.

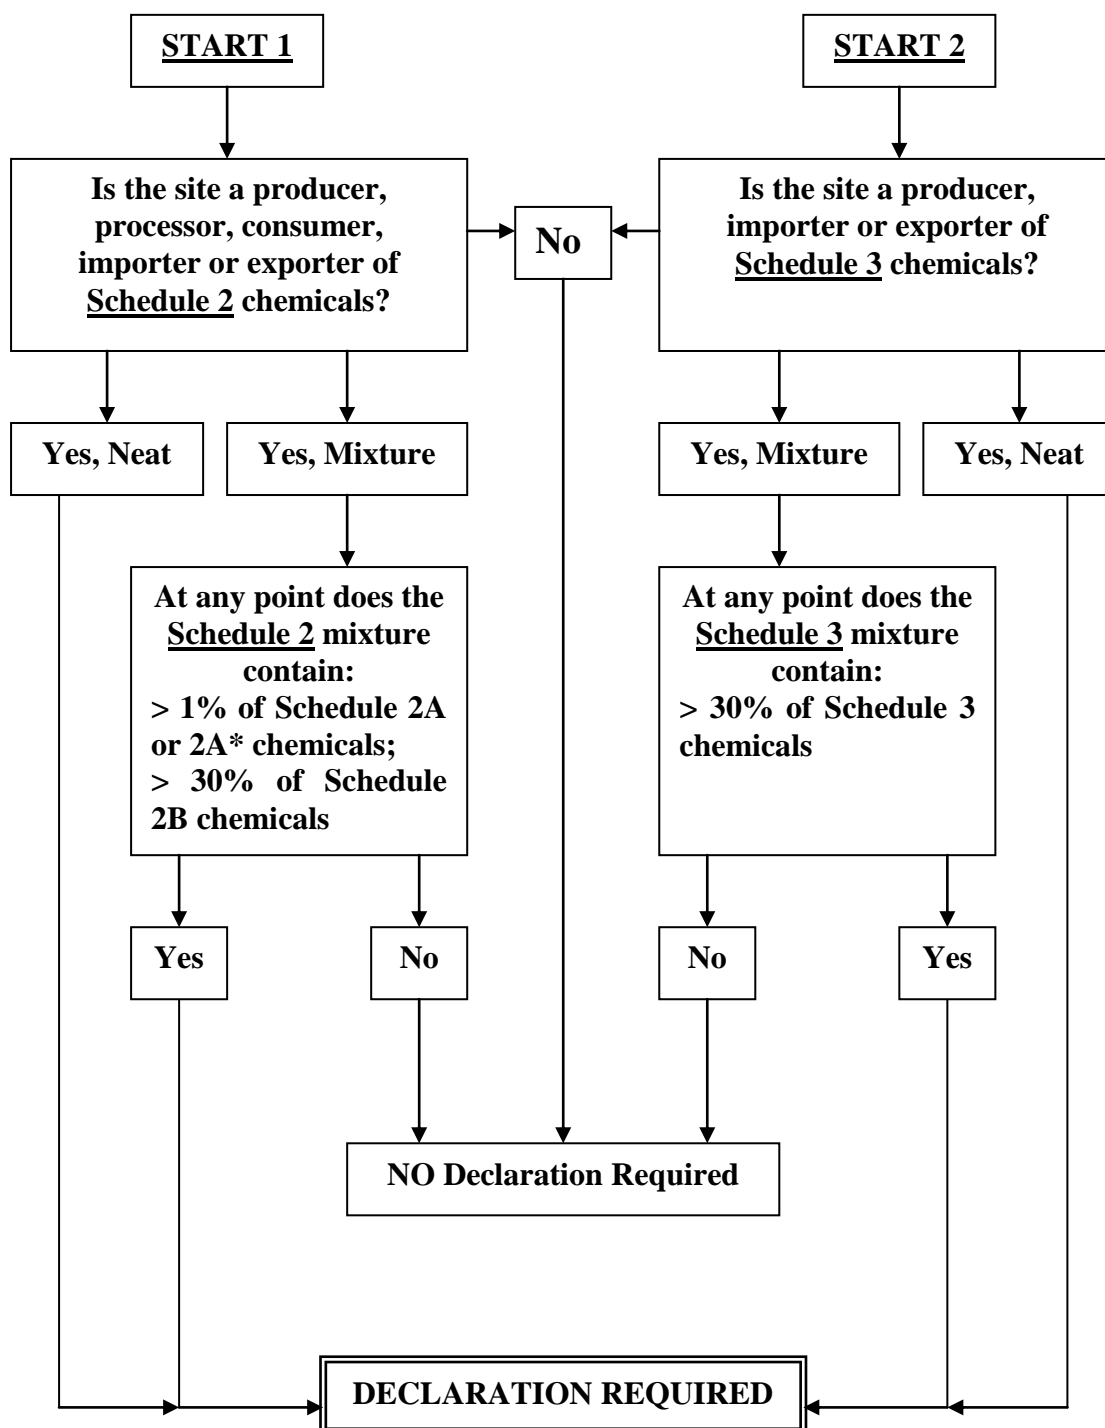

Department
of Energy &
Climate Change

This concentration level also applies to the import and export of chemical mixtures containing Schedule 3 chemicals.

Annex D **Declaration Flow Chart**

Annex E **Crown Dependencies and British Overseas Territories**

Crown Dependencies

- Guernsey
- Isle of Man
- Jersey

British Overseas Territories

- Anguilla
- Bermuda
- British Antarctic Territory
- British Indian Ocean Territory
- British Virgin Islands
- Cayman Islands
- Falkland Islands
- Gibraltar
- Montserrat
- Pitcairn Islands
- South Georgia and the South Sandwich Islands
- St Helena (with sub-dependencies Tristan da Cunha and Ascension Island)
- Turks and Caicos Islands
