Monday

Research Culture Networking Breakfast

This informal networking event brings together those who are active in developing a better research culture in their units so that we can meet, learn from and support each other.

Research Integrity and Culture Week: Launch Event

This event will introduce the key themes of the week – from what we mean when talking about Integrity and Culture to why they are important concepts.

Leadership in Research Integrity and Culture

Dept/School leads only

Using data, figures and facts as a basis for discussion, Research Leads will be encouraged to identify challenges and solutions relating to achieving and promoting best practice in research integrity and culture.

Exploring Culture and Integrity in Practice: Research Staff

Research staff only

This workshop will explore key aspects of culture & integrity, looking at case studies and topics specifically relevant for research staff members.

Tuesday

Research, Integrity and the Sustainable Development Goals

This workshop invites attendees to reflect on how your research approaches and practices will impact both positively and negatively on the world.

Where Next for Research Integrity and Culture?

This event will present perspectives on research integrity and culture from experts in the UK Higher Education sector. Participants will learn more about the future directions and priorities for embedding a culture of research integrity in universities and beyond.

Universities Scotland RKEC Roundtable Discussion

Invitees only

This closed event is focused on how the Scottish HE sector can work collaboratively to fulfil commitments and drive best practice on research integrity and culture.

Wednesday

Responsible Research Assessment—What Does It Look Like?

This interactive event will bring together staff to explore what is meant by responsible research assessment and how it applies to activities at Strathclyde.

Culture Café: Engineering

This is an opportunity to explore research culture challenges together with colleagues across your Faculty.

Culture Café: Humanities and Social Sciences

This is an opportunity to explore research culture challenges together with colleagues across your Faculty.

Protecting Integrity Through Responsible Research Data Management

Using case studies, this event explores how responsible research data management and sharing are crucial to protecting research integrity.

Ethics and Research Governance—Why Do We Need It?

This event will explore why ethics and research governance processes are needed and what might happen if they didn't exist.

Thursday

Culture Café: Strathclyde Business School

This is an opportunity to explore research culture challenges together with colleagues across your Faculty.

Culture Café: Science

This is an opportunity to explore research culture challenges together with colleagues across your Faculty.

Exploring Research Integrity and Culture in Practice for PGRs

Doctoral researchers only

Focused on PGR-specific contexts, this workshop will enable participants to consider factors that contribute to developing a positive research culture.

Fostering a Culture of Openness and Inclusivity

This event will explore the concepts and benefits of inclusivity and openness relating to research culture and research integrity, offering the opportunity to hear from Deputy Associate Principals.

Promoting a Positive Research Culture: Supervisors and Line Managers

PGR supervisors/line managers only

Focused on research supervisor/line management-specific contexts, this workshop will enable participants to consider factors that contribute to developing a positive research culture within their group.

Friday

Online Resources on the RKES Portal

The RKES Portal already holds a number of internal and external resources to support best practice in research integrity and culture.

Further resources will be added during the Week, including discussion packs for you to engage with in research groups.

Recordings from the Week's events will also be available from Friday 27th.
