From the President Paul Nurse

22 July 2015 Our ref: SSEHC/RJ

Dear Professor McDonald

The Royal Society invites proposals from UK based scientists for two of its most prestigious activities, the scientific programme and the Summer Science Exhibition.

Scientific programme

The Royal Society scientific programme presents excellent opportunities for UK-based scientists to demonstrate scientific leadership and vision to run an interdisciplinary international conference as part of the regular calendar of the events at the Royal Society, the UK's national academy of science. Please find the 2015-2016 programme enclosed. The Society is currently inviting proposals for scientific meetings to be held in late 2016/early 2017 as part of the scientific programme in London and at the Kavli Royal Society Centre. The deadline to submit proposals is Wednesday 30 September 2015. For further information please visit royalsociety.org/events/scientific-meetings.

Summer Science Exhibition 2016

The Summer Science Exhibition is an excellent opportunity to showcase cutting-edge research to members of the public, school students, policy makers, MPs, and funding bodies as well as the wider scientific community. Over 12,000 visitors are expected to attend next year's exhibition, with a further 100,000 visits online. The exhibition also attracts widespread media interest, making it an ideal opportunity to bring your university's research to a broad audience. The exhibition will take place from 4 – 10 July 2016, with proposals accepted until Monday 21 September 2015.

I encourage you to make these opportunities known to the relevant Departments, Schools or Faculties in your University, and support them in submitting a proposal. Should you or your colleagues have any further questions please see the relevant contact details on the enclosed flyers.

Yours sincerely

Paul Nurse

Paul Nurse

President Sir Paul Nurse
Executive Director Dr Julie Maxton

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science.
